

Weekly SOC Report

Analyst Report — Detailed Technical Findings

Prepared for: Northwind Trading Co.

Prepared by: Contoso MSSP

Data source: WAZUH (wazuh_sample.json)

Reporting period: 2026-09-20 to 2026-09-27

Generated: 2026-09-27 05:23 UTC

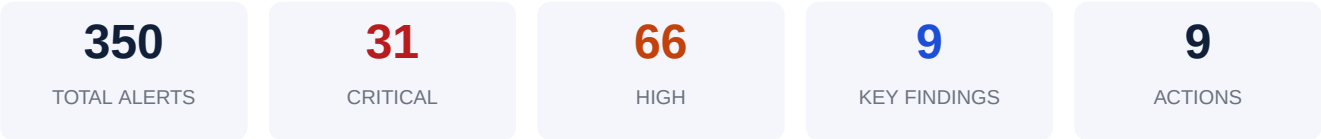

OVERALL SECURITY POSTURE

Critical attention required

Derived from 350 analyzed alerts (31 Critical, 66 High, 61 Medium, 192 Low) and 6 correlated attack-shaped source/rule cluster(s).

CONFIDENTIAL — This report is generated automatically from uploaded security telemetry. AI-assisted content is evidence-bound: every finding cites underlying event IDs. Recommended actions are recommendations for a human analyst, not statements of fact or automated changes.

1. Executive Summary

This report covers 350 Wazuh alerts. Of these, 97 are High or Critical severity (31 Critical, 66 High) and warrant analyst attention. The dominant recurring pattern is "Recurring rule "sshd: Attempt to login using a non-existent user" (rule 5710)" (109 alerts; evidence 1691000002.961578, 1691000003.638747, 1691000004.679904, 1691000012.789275). 6 high-volume low/medium-severity rule(s) are flagged as false-positive / tuning candidates for analyst review. All statements above are derived solely from the uploaded evidence; no external threat intelligence, IOCs, or incident conclusions have been added.

What management should know

- 350 total alerts were normalized from the upload spanning 2026-09-20 to 2026-09-27.
- Severity breakdown — Critical: 31, High: 66, Medium: 61, Low: 192.
- The most active source/rule cluster is 50.48.207.164 -> "sshd: Attempt to login using a non-existent user" with 29 alerts (evidence: 1691000013.989255, 1691000018.645314, 1691000023.307192, 1691000029.659228, 1691000034.230081).

2. Security Posture

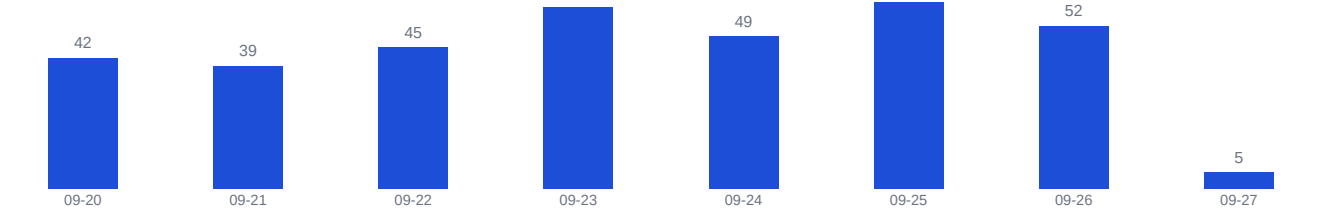

Severity distribution

Alert activity

- Repeated activity: 350 alerts belong to rule signatures that fired 3 or more times in this dataset.
- Lower-frequency activity: 0 alerts from rule signatures seen only once or twice in this dataset. (This reflects in-dataset frequency, not novelty versus a prior report — see Historical Comparison for newly appearing categories.)

Daily alert trend

3. Historical Comparison

Historical comparison unavailable. No previous report exists for this data source yet.

4. Alert & Incident Analysis

Top alert types

Value	Alerts
sshd: Attempt to login using a non-existent user	109
sshd: Multiple authentication failures (possible brute force)	66
Multiple web server 400 error codes from same source ip	41
PAM: Login session opened	32
Successful sudo to ROOT executed	29

Value	Alerts
Netstat listened ports status changed	22
Integrity checksum changed	20
Windows: Malware detected by Windows Defender	19
Possible exploitation of public-facing application (SQLi pattern)	12

Top source IPs

Value	Alerts
50.48.207.164	50
126.139.169.49	41
102.97.134.140	33
107.41.222.56	1
109.96.176.177	1
11.23.144.68	1
11.76.0.196	1
110.210.245.151	1
111.126.254.49	1
112.139.109.249	1

Top affected hosts

Value	Alerts
app01	52
app02	50
bastion01	46
web02	46
db01	44
web01	43
mail01	37
k8s-node1	32

Top affected users

Value	Alerts
www-data	12
admin	11
asmith	8
jdoe	7
svc_backup	7
ubuntu	6

Value	Alerts
postgres	5
root	5

5. Top Security Findings

Finding 1: Recurring Critical alert: "Windows: Malware detected by Windows Defender"

Severity: Critical Confidence: Medium Category: malware

Rule "Windows: Malware detected by Windows Defender" (87105) fired 19 times in the reporting window across 7 host(s).

Affected assets: app01, bastion01, db01, k8s-node1, mail01, web01, web02, admin

Time span: 2026-09-21 03:08 UTC -> 2026-09-26 14:42 UTC

Evidence event IDs: 1691000010.825957, 1691000041.621468, 1691000052.948629, 1691000091.725370, 1691000112.519916, 1691000157.610747, 1691000165.947848, 1691000169.383823, 1691000176.976313, 1691000177.725134, 1691000185.713114, 1691000186.751643, 1691000194.428121, 1691000207.651411, 1691000263.107699

Finding 2: Recurring Critical alert: "Possible exploitation of public-facing application (SQLi pattern)"

Severity: Critical Confidence: Medium Category: web_exploit

Rule "Possible exploitation of public-facing application (SQLi pattern)" (100201) fired 12 times in the reporting window across 6 host(s).

Affected assets: app02, bastion01, k8s-node1, mail01, web01, web02

Time span: 2026-09-21 01:47 UTC -> 2026-09-27 00:59 UTC

Evidence event IDs: 1691000033.138282, 1691000040.845954, 1691000074.956801, 1691000090.542067, 1691000094.612244, 1691000117.315000, 1691000120.213455, 1691000172.777065, 1691000230.482647, 1691000277.147689, 1691000282.702148, 1691000341.591262

Finding 3: Recurring High alert: "sshd: Multiple authentication failures (possible brute force)"

Severity: High Confidence: Medium Category: brute_force

Rule "sshd: Multiple authentication failures (possible brute force)" (5712) fired 66 times in the reporting window across 8 host(s).

Affected assets: app01, app02, bastion01, db01, k8s-node1, mail01, web01, web02

Time span: 2026-09-20 08:17 UTC -> 2026-09-26 19:34 UTC

Evidence event IDs: 1691000001.130807, 1691000011.793485, 1691000020.139210, 1691000025.455906, 1691000026.313932, 1691000027.312974, 1691000030.449228, 1691000043.208823, 1691000044.880164, 1691000050.817193, 1691000055.140278, 1691000060.176339, 1691000071.758882, 1691000079.354882, 1691000080.442437

Finding 4: Repeated "sshd: Multiple authentication failures (possible brute force)" from 50.48.207.164

Severity: High Confidence: High Category: brute_force

21 alerts share source IP 50.48.207.164 and the rule "sshd: Multiple authentication failures (possible brute force)", a correlated pattern consistent with brute force activity against 8 asset(s).

Affected assets: admin, asmith, jdoe, postgres, root, svc_backup, ubuntu, www-data

Time span: 2026-09-20 08:17 UTC -> 2026-09-26 18:31 UTC

Evidence event IDs: 1691000011.793485, 1691000025.455906, 1691000027.312974, 1691000055.140278, 1691000080.442437, 1691000083.227246, 1691000089.669917, 1691000109.302520, 1691000113.392525, 1691000140.444114, 1691000193.988136, 1691000218.433610, 1691000228.577480, 1691000229.812204, 1691000245.976609

Finding 5: Repeated "sshd: Multiple authentication failures (possible brute force)" from 126.139.169.49

Severity: High Confidence: High Category: brute_force

14 alerts share source IP 126.139.169.49 and the rule "sshd: Multiple authentication failures (possible brute force)", a correlated pattern consistent with brute force activity against 8 asset(s).

Affected assets: admin, asmith, jdoe, postgres, root, svc_backup, ubuntu, www-data

Time span: 2026-09-20 14:40 UTC -> 2026-09-26 17:57 UTC

Evidence event IDs: 1691000001.130807, 1691000026.313932, 1691000030.449228, 1691000043.208823, 1691000079.354882, 1691000130.147078, 1691000226.880038, 1691000249.769682, 1691000266.659413, 1691000268.724770, 1691000291.615925, 1691000306.337437, 1691000319.119238, 1691000338.770348

Finding 6: Repeated "sshd: Multiple authentication failures (possible brute force)" from 102.97.134.140

Severity: High Confidence: High Category: brute_force

11 alerts share source IP 102.97.134.140 and the rule "sshd: Multiple authentication failures (possible brute force)", a correlated pattern consistent with brute force activity against 8 asset(s).

Affected assets: asmith, jdoe, postgres, root, svc_backup, app01, db01, web01

Time span: 2026-09-20 10:44 UTC -> 2026-09-26 19:34 UTC

Evidence event IDs: 1691000044.880164, 1691000071.758882, 1691000097.337640, 1691000100.283179, 1691000103.727933, 1691000152.851183, 1691000171.547272, 1691000189.412787, 1691000203.899946, 1691000209.482715, 1691000235.536688

Finding 7: Repeated "sshd: Attempt to login using a non-existent user" from 50.48.207.164

Severity: Low Confidence: High Category: other

29 alerts share source IP 50.48.207.164 and the rule "sshd: Attempt to login using a non-existent user", a correlated pattern consistent with other activity against 8 asset(s).

Affected assets: admin, asmith, jdoe, postgres, root, svc_backup, ubuntu, www-data

Time span: 2026-09-20 09:50 UTC -> 2026-09-27 01:32 UTC

Evidence event IDs: 1691000013.989255, 1691000018.645314, 1691000023.307192, 1691000029.659228, 1691000034.230081, 1691000036.275088, 1691000061.550926, 1691000107.968593, 1691000110.474268, 1691000111.815320, 1691000114.352274, 1691000115.848379, 1691000145.840150, 1691000159.237637, 1691000166.831746

Finding 8: Repeated "sshd: Attempt to login using a non-existent user" from 126.139.169.49

Severity: Low Confidence: High Category: other

27 alerts share source IP 126.139.169.49 and the rule "sshd: Attempt to login using a non-existent user", a correlated pattern consistent with other activity against 8 asset(s).

Affected assets: admin, asmith, jdoe, postgres, root, svc_backup, ubuntu, www-data

Time span: 2026-09-20 10:53 UTC -> 2026-09-26 17:38 UTC

Evidence event IDs: 1691000058.212093, 1691000092.442143, 1691000136.767194, 1691000141.489281, 1691000147.952428, 1691000149.465775, 1691000156.891226, 1691000179.539087, 1691000204.428172, 1691000206.320494, 1691000212.443818, 1691000214.308436, 1691000236.586281, 1691000239.738045, 1691000258.122825

Finding 9: Repeated "sshd: Attempt to login using a non-existent user" from 102.97.134.140

Severity: Low Confidence: High Category: other

22 alerts share source IP 102.97.134.140 and the rule "sshd: Attempt to login using a non-existent user", a correlated pattern consistent with other activity against 8 asset(s).

Affected assets: admin, jdoe, postgres, root, svc_backup, ubuntu, www-data, app01

Time span: 2026-09-20 17:10 UTC -> 2026-09-26 22:32 UTC

Evidence event IDs: 1691000002.961578, 1691000038.186978, 1691000039.420225, 1691000059.582423, 1691000067.626472, 1691000073.739567, 1691000088.479545, 1691000118.634871, 1691000122.731963, 1691000123.891424, 1691000134.256857, 1691000150.198166, 1691000164.793263, 1691000180.665397, 1691000188.787475

6. Recurring Patterns

Pattern	Sev	Count	Evidence event IDs
Recurring rule "sshd: Attempt to login using a non-existent user" (rule 5710)	Low	109	1691000002.961578, 1691000003.638747, 1691000004.679904, 1691000012.789275, 1691000013.989255, 1691000018.645314, 1691000019.424451, 1691000023.307192
Recurring rule "sshd: Multiple authentication failures (possible brute force)" (rule 5712)	High	66	1691000001.130807, 1691000011.793485, 1691000020.139210, 1691000025.455906, 1691000026.313932, 1691000027.312974, 1691000030.449228, 1691000043.208823

Pattern	Sev	Count	Evidence event IDs
Recurring rule "Multiple web server 400 error codes from same source ip" (rule 31151)	Medium	41	1691000000.176948, 1691000009.294305, 1691000014.693754, 1691000016.781012, 1691000017.685212, 1691000024.435005, 1691000028.629389, 1691000047.263989
Recurring rule "PAM: Login session opened" (rule 5501)	Low	32	1691000005.113553, 1691000007.731143, 1691000008.719731, 1691000057.837022, 1691000064.535297, 1691000066.651680, 1691000069.378411, 1691000076.622157
Repeated "sshd: Attempt to login using a non-existent user" from source IP 50.48.207.164	Low	29	1691000013.989255, 1691000018.645314, 1691000023.307192, 1691000029.659228, 1691000034.230081, 1691000036.275088, 1691000061.550926, 1691000107.968593
Recurring rule "Successful sudo to ROOT executed" (rule 5402)	Low	29	1691000006.837716, 1691000022.655447, 1691000032.878769, 1691000037.218978, 1691000051.927535, 1691000054.758186, 1691000086.118935, 1691000093.980850
Repeated "sshd: Attempt to login using a non-existent user" from source IP 126.139.169.49	Low	27	1691000058.212093, 1691000092.442143, 1691000136.767194, 1691000141.489281, 1691000147.952428, 1691000149.465775, 1691000156.891226, 1691000179.539087
Repeated "sshd: Attempt to login using a non-existent user" from source IP 102.97.134.140	Low	22	1691000002.961578, 1691000038.186978, 1691000039.420225, 1691000059.582423, 1691000067.626472, 1691000073.739567, 1691000088.479545, 1691000118.634871
Recurring rule "Netstat listened ports status changed" (rule 533)	Low	22	1691000021.234987, 1691000035.394357, 1691000045.367168, 1691000063.370888, 1691000065.407098, 1691000068.221848, 1691000078.405361, 1691000084.675808

Pattern	Sev	Count	Evidence event IDs
Repeated "sshd: Multiple authentication failures (possible brute force)" from source IP 50.48.207.164	High	21	1691000011.793485, 1691000025.455906, 1691000027.312974, 1691000055.140278, 1691000080.442437, 1691000083.227246, 1691000089.669917, 1691000109.302520

7. False-Positive / Tuning Candidates

Flagged for analyst review — these are CANDIDATES, not determinations. Analyst validation required.

Rule	Sev	Count	% total	Reason / evidence
sshd: Attempt to login using a non-existent user	Low	109	31.1%	High-volume low-severity rule accounting for 31.1% of all alerts. Flagged as a possible false-positive / tuning candidate for analyst review — this is NOT a determination. Evidence: 1691000002.961578, 1691000003.638747, 1691000004.679904, 1691000012.789275, 1691000013.989255
Multiple web server 400 error codes from same source ip	Medium	41	11.7%	High-volume medium-severity rule accounting for 11.7% of all alerts. Flagged as a possible false-positive / tuning candidate for analyst review — this is NOT a determination. Evidence: 1691000000.176948, 1691000009.294305, 1691000014.693754, 1691000016.781012, 1691000017.685212
PAM: Login session opened	Low	32	9.1%	High-volume low-severity rule accounting for 9.1% of all alerts. Flagged as a possible false-positive / tuning candidate for analyst review — this is NOT a determination. Evidence: 1691000005.113553, 1691000007.731143, 1691000008.719731, 1691000057.837022, 1691000064.535297
Successful sudo to ROOT executed	Low	29	8.3%	High-volume low-severity rule accounting for 8.3% of all alerts. Flagged as a possible false-positive / tuning candidate for analyst review — this is NOT a determination. Evidence: 1691000006.837716, 1691000022.655447, 1691000032.878769, 1691000037.218978, 1691000051.927535

Rule	Sev	Count	% total	Reason / evidence
Netstat listened ports status changed	Low	22	6.3%	High-volume low-severity rule accounting for 6.3% of all alerts. Flagged as a possible false-positive / tuning candidate for analyst review — this is NOT a determination. Evidence: 1691000021.234987, 1691000035.394357, 1691000045.367168, 1691000063.370888, 1691000065.407098
Integrity checksum changed	Medium	20	5.7%	High-volume medium-severity rule accounting for 5.7% of all alerts. Flagged as a possible false-positive / tuning candidate for analyst review — this is NOT a determination. Evidence: 1691000015.302310, 1691000031.963297, 1691000053.867339, 1691000101.172947, 1691000102.153449

8. MITRE ATT&CK Mapping

Tactic	Technique	ID	Confidence	Evidence event IDs

9. Recommended Actions (Management Action Plan)

AI-assisted recommendations for a human analyst — not statements of fact and not automated changes.

Pri	Finding	Recommended action	Owner	Status
P1	Recurring Critical alert: "Windows: Malware detected by Windows Defender"	Triage the affected host per the incident-response runbook; run a full anti-malware scan; verify containment and remediation.	Incident Response	open
P1	Recurring Critical alert: "Possible exploitation of public-facing application (SQLi pattern)"	Review web/application logs for signs of successful exploitation; ensure the public-facing application is patched; engage AppSec.	AppSec / Incident Response	open
P2	Recurring High alert: "sshd: Multiple authentication failures (possible brute force)"	Review authentication activity from the cited source(s); consider temporary blocking at the firewall/WAF; confirm account-lockout thresholds are enforced and check whether any authentication succeeded after the attempts.	SOC Analyst / Identity Team	open
P2	Repeated "sshd: Multiple authentication failures (possible brute force)" from 50.48.207.164	Review authentication activity from the cited source(s); consider temporary blocking at the firewall/WAF; confirm account-lockout thresholds are enforced and check whether any authentication succeeded after the attempts.	SOC Analyst / Identity Team	open
P2	Repeated "sshd: Multiple authentication failures (possible brute force)" from 126.139.169.49	Review authentication activity from the cited source(s); consider temporary blocking at the firewall/WAF; confirm account-lockout thresholds are enforced and check whether any authentication succeeded after the attempts.	SOC Analyst / Identity Team	open
P2	Repeated "sshd: Multiple authentication failures (possible brute force)" from 102.97.134.140	Review authentication activity from the cited source(s); consider temporary blocking at the firewall/WAF; confirm account-lockout thresholds are enforced and check whether any authentication succeeded after the attempts.	SOC Analyst / Identity Team	open
P4	Repeated "sshd: Attempt to login using a non-existent user" from 50.48.207.164	Analyst to review the cited events and determine disposition.	SOC Analyst	open
P4	Repeated "sshd: Attempt to login using a non-existent user" from 126.139.169.49	Analyst to review the cited events and determine disposition.	SOC Analyst	open
P4	Repeated "sshd: Attempt to login using a non-existent user" from 102.97.134.140	Analyst to review the cited events and determine disposition.	SOC Analyst	open
